About

I'm a passionate Web Application Developer specialising in MERN Stack Web Development. As a full-stack developer, I can convert Figma design to a perfect responsive web template and give them life using React Js. I can develop scalable REST APIs using Node Js, Express Js & Mongo DB and connect them with front-end applications.

Skills

Front-End: HTML CSS Sass ReactJs NextJs Redux TailwindCSS Material UI
JavaScript

Back-End: Express NodeJs Mongo DB TypeScript Firebase PostgreSQL

Tools: Figma Adobe Photoshop Adobe XD Linux Git & GitHub VS Code

Recent Projects

● JSBook (Online JavaScript Playground)

JSBook is a browser based JavaScript code runner where a user can write, test and practice JavaScript.

Technologies: JavaScript ReactJs Redux TypeScript Esbuild IndexedDB

Features:

- Users can type and run JavaScript in browser window.
- Npmjs package import supported.
- Supports ReactJs without any package.
- Supports note writing in markdown format.
- Supports creating, editing and deleting of code/note cells.
